# TBM Switch

Timeline, BigSky & Mobius Multi Switch

You may say "That's all it is?" yup, that's it.

To use this switch with your Strymon pedal you must first upgrade the firmware to the latest version. www.strymon.net/update

Connect this Switch to the EXP input of your TimeLine, BigSky, or Mobius with a 1/4" TRS cable. Set your expression mode setting in the "global settings" of your pedal.

Read the Multi Switch manual for details.
